Graduate Student Researcher Position

Position: Graduate Student Researcher (GSR) Position
Work hours: 8 hours/week
Begin: Spring 2016
End: Fall 2016

Description and Responsibilities: This GSR will assist in searching references, updating EndNote Libraries, entering and cleaning research data and files, preparing Tables, Figures, posters and slides for dissemination, and other duties as assigned. Excellent interpersonal and communication skills are required to efficiently and effectively work with statisticians, co-investigators, research staff, postdoctoral fellows, and graduate students at UC San Francisco, UC Berkeley and Stanford University. Our interdisciplinary research team focuses on the development of behavioral algorithms for physical activity and weight loss interventions to prevent cardiovascular disease and type 2 diabetes.

This position is based at the UC San Francisco Laurel Height Campus, San Francisco, CA. The position may be renewed after Fall 2016

Required Qualifications:
• Completion of B187: Introduction to Statistical Theory & Practice and B192: Introduction to Linear Models courses
• Knowledge of PubMed and other academic search engines
• Proficiency using EndNote and SPSS software programs
• Highly detail-oriented and meticulous with data
• Excellent written, verbal, organizational, computer troubleshooting, and interpersonal skills
• Proficiency using MS Word, Excel, PowerPoint, Outlook, and Adobe Acrobat
